

**EXIM Thailand Finances Gissco's Production and Export of Metal Casting Machinery to Sharpen Thai SMEs' Global Competitiveness through Product Innovation**

Mrs. Wantana Mongkolsri (center), Senior Executive Vice President of Export-Import Bank of Thailand (EXIM Thailand), jointly with Mr. Sangop Thanabumrunkul (right), Managing Director, Gissco Co., Ltd. (Gissco), and Assoc. Prof. Dr. Jessada Wannasin (left), CEO of Gissco, signed a financial facility agreement worth 5 million baht on November 7, 2018 at EXIM Thailand's Head Office to support Gissco's expansion of production and export of metal casting machinery and equipment. Gissco is an SME with a success story in translating their R&D into product invention under "GISS" Technology (Gas Induced Semi-Solid Technology) which has won a number of international awards. GISS Technology helps close certain technological gaps for metal casters and parts producers by reducing formation of air bubbles and waste material associated with the die-casting process, resulting in around 20% higher efficiency in die casting, twice longer die life, and significant cost reduction.
